Subject: Fw: VPDES Permit No. VA0021105, Gordonsville WWTP, For Review

Hello Elleanore and Bryant. We recieved the draft permit for Gordonsville WWTP (VA0021105) on 9/18/2012. Our records show that this is a minor permit discharging to a stream with an approved TMDL. Therefore, we have performed a limited review based on the wasteload allocations (WLAs) in the approved TMDL. I have completed this limited review and have no comment related to the compliance with the TMDL requirements. Thanks

Subject: VPDES Permit No. VA0021105, Gordonsville WWTP, For Review

Mark,

In accordance with the Memorandum of Understanding regarding permit and enforcement programs between the State Water Control Board and the Regional Administrator, Region III, U.S. Environmental Protection Agency, documentation supporting reissuance of the VPDES permit for the Gordonsville WWTP, VPDES Permit #VA0021105, is posted at <http://www.deq.virginia.gov/filesare/wps/EPA/NRO/VA0021105/>. The draft permit and draft fact sheet are available for your review.

This proposed permit reissuance is for a minor, municipal facility in the York River Basin located in Orange County, Virginia. This facility is identified in the bacteria Total Maximum Daily Load (TMDL) study for the Pamunkey River Basin which was approved by EPA in August 2006.

If EPA does not comment or object within 30 days of receipt of this notification, processing of the referenced permit will be deemed acceptable to the Regional Administrator.

Please let us know if you need additional information to complete your review.

Respectfully,
Bryant
